Zurich, 13 June 2005

Banks in Switzerland, 2004 edition

Summary and key statistics

The banks in Switzerland increased their annual profits by CHF 2.7 billion to CHF 15.6 billion (+21.2%) from the previous year¹. This rise was due primarily to the significant fall in depreciation and value adjustments. In contrast to the previous year, 2004 also saw an increase in profit from banking operations (gross profit: +8.0%). This was due first and foremost to commission business and services. Growth in interbank and lending business drove up aggregate assets and liabilities by 11.3%. The continuing recovery on the stock markets influenced the volume of custody accounts, the value of which rose by 7.7%. The banks in Switzerland increased the number of employees on their payrolls by 2.4% to 115,628 full-time equivalents. Branches abroad were the main beneficiaries of this expansion; within Switzerland, personnel numbers were virtually static at 99,547.

	2003 ^I	2004	
Profit (in CHF millions)	12,878	15,607	(+21.2%)
Loss (in CHF millions)	108	116	(7.5%)
Gross operating profit (in CHF millions)	21,395	23,100	(+8.0%)
Total assets and liabilities (in CHF billions)	2,237	2,491	(+11.3%)
Securities holdings in custody accounts^{II} (in CHF billions)	3,293	3,546	(+7.7%)
Fiduciary assets and liabilities (in CHF billions)	310	315	(+1.5%)
Number of institutions	342	338	(-1.2%)
Number of employees^{III}	112,915	115,628	(+2.4%)

^I Figures may have been revised since their inclusion in last year's publication.

^{II} With offices in Switzerland and with the Swiss National Bank. Securities held by branches abroad are not covered.

^{III} Employees of offices in Switzerland and of their legally dependent branches abroad (full-time equivalents).

¹ The term "bank", as used in the publication "Banks in Switzerland", refers to the reporting entity "parent company", i.e. offices in Switzerland plus their legally dependent branches abroad. In the Financial Stability Report that is published concurrently, the same term refers to the reporting entity "banking group". This distinction may result in apparent discrepancies.

Income statement

Of the 338 banks covered, 316 reported a profit for 2004 and 22 a loss. Aggregate annual profit rose by CHF 2.7 billion from the previous year to CHF 15.6 billion (+21.2%). The sharp rise was due primarily to the changes in depreciation and value adjustments. These fell sharply in almost all categories of banks, but especially at the big banks. Aggregate losses for the year increased by CHF 8.2 million to CHF 116.4 million (+7.5%).

In contrast to the previous year, 2004 also saw an increase in profit from banking operations (gross profit). This rose by CHF 1.7 billion to CHF 23.1 billion (+8.0%). The increase can be ascribed mainly to commission income, which was substantially higher (+9.9%) in almost all categories of banks. On the other hand, net interest income decreased by 4.2%. This decline can be attributed to developments at the big, cantonal and commercial banks; in the other categories, earnings from interest-differential business rose. Similarly, the leap in net dealing income (+68.3%) was largely due to the results of one of the big banks. If this bank's figures are factored out, net dealing income shows a slight decrease. Personnel expenses climbed by 6.1%, reflecting a rise in costs that easily exceeded the growth in headcounts. General overheads, too, edged up again in 2004 (+4.1%) after having decreased sharply in the two preceding years.

Balance sheet business

The aggregate assets and liabilities of the banks in Switzerland increased by 11.3% from the previous year. Mortgage business (+3.9%) benefited once again from the persistently low level of interest rates. Other claims against customers rose sharply as well (+12.0%). Here, however, the rise was due solely to foreign business (+21.5%), whereas claims against domestic customers fell again (-3.0%). Moreover, both claims from interbank business (+13.3%) and the value of trading portfolios (+23.3%) were up.

After a succession of years in which funds were shifted out of time deposits and into savings deposits, 2004 saw a renewed rise in the popularity of time deposits. In most cases, investors chose time deposits with maturities of less than one year. Consequently, the banks' time liabilities gained in importance (+18.8%) while liabilities in the form of savings and deposits virtually stagnated.

Securities holdings in custody accounts

Rising share prices pushed up the volume of securities managed in the banks¹² custody accounts. The value of these holdings rose by CHF 253 billion to CHF 3,546 billion (+7.7%). 50.4% of these assets were held by institutional investors, 39.0% by private investors and 10.6% by commercial investors.

¹² Securities holdings are recorded at the bank office level. This reporting entity includes offices in Switzerland but excludes branches abroad. Securities holdings at the Swiss National Bank are also included.

The Swiss franc remained the most important investment currency, with a 46.3% share of the total (2003: 46.6%). The proportion of securities held in euros edged up from 25.5% to 26.0% while the share held in US dollars receded from 21.6% to 20.8%. The role of the US dollar as a currency for securities holdings thus diminished again. The decline can be ascribed mainly to the dollar's continuing depreciation and to higher interest rates.

Fiduciary business

2004 saw a 1.5% rise in the value of fiduciary deposits held for resident and foreign bank customers. This rise was due mainly to developments in the money and foreign exchange markets: the higher rates for short-term US dollar or Swiss franc deposits enhanced the appeal of fiduciary investments in these currencies. However, the US dollar's continuing depreciation and uncertain development impacted negatively on the value and attractiveness of the investments held in this currency. On balance, therefore, investments in Swiss francs were up by 20.2% whereas minor falls were recorded for both US dollars (-1.3%) and euros (-1.0%).

With a share of 49.6%, however, the US dollar remained the leading investment currency, followed by the euro with 32.9%. The Swiss franc continued to play a minor role, accounting for just 5.3% of investments.

Employment

The banks in Switzerland increased the number of employees on their payrolls by 2.4% to 115,628 full-time equivalents. Most of this growth was recorded at the branches abroad, where personnel numbers rose by 2,626 to 16,081 (+19.5%). Within Switzerland, headcounts remained virtually unchanged at 99,547 full-time equivalents (2003: 99,460).

Explanation of symbols

0	Smaller than half of the unit used, but larger than zero (<i>rounded zero</i>).
—	No data reported or a rate of change or a difference was calculated based on two exactly equal values (<i>absolute zero</i>).
.	Figure unknown, confidential, meaningless, no longer reported or no reporting institutions (<i>missing value</i>).
195	Figures in bold type are published for the first time in the current issue of <i>Banks in Switzerland</i> or had to be revised or corrected from the previous issue.
—	Break in the series.

Notes

Rounding differences

The figures in the tables are rounded. Where rounded figures are used in calculations (totals, balances, rates of change, shares), deviations from the exact values can result.
