Zurich, 16 June 2008

Banks in Switzerland, 2007 edition¹

For most banks in Switzerland, 2007 was a successful year with higher annual profit figures than in 2006. This was due, in particular, to a rise in the net profit from commission business and services. The effect of the turmoil on international financial markets on annual accounts was no more than partial. The big banks were particularly strongly affected. The negative result reported by one big bank substantially affected the increase in annual loss and the decline in gross profit. This applies both to the individual financial statements as required by law, discussed in this publication, and for the group results (cf. separate box in paragraph headed 'Profit and loss account').

Key figures

	2006 ^I	2007	
Annual profit (CHF millions)	20,139	14,101	(-30.0%)
Annual loss (CHF millions)	47	4,306	+4,258
Gross profit (CHF millions)	29,912	24,219	(-19.0%)
Balance sheet total (CHF billions)	3,194	3,458	(+8.3%)
Securities holdings in custody accounts^{II} (CHF billions)	5,017	5,404	(+7.7%)
Fiduciary business (CHF billions)	434	483	(+11.3%)
Number of institutions	331	330	-1
Number of staff^{III}	127,921	136,201	(+6.5%)

^I Figures may have been revised since their inclusion in last year's publication.

^{II} At offices in Switzerland and at the Swiss National Bank. Securities held by branches abroad are not covered.

^{III} Employees of offices in Switzerland and of their legally dependent branches abroad (full-time equivalents).

¹ The term 'bank', as used in the publication *Banks in Switzerland*, refers to the 'parent company' reporting entity, i.e. to offices in Switzerland plus their legally dependent branches abroad (individual financial statements as required by law). In the *Financial Stability Report* (published concurrently), the big banks are discussed under the 'group' reporting entity.

Summary

The total annual profit of all the banks dropped by 30.0% to CHF 14.1 billion (2006: CHF 20.1 billion). 10 banks recorded losses of a total CHF 4.3 billion (2006: CHF 47.4 million). The negative result of one big bank made a major contribution to the substantial increase in the annual loss. The aggregate balance sheet total rose by 8.3% to CHF 3,457.9 billion, with major increases recorded in both claims arising out of interbank business (+15.0%) and those attributable to customer business (+14.8%). The value of securities held in custody accounts rose by 7.7% to CHF 5,403.7 billion. Institutional customers constituted the most important customer group among domestic and foreign custody account holders. Their importance has increased over the past few years and by 2007 they accounted for 57.2% of all customers. Fiduciary funds managed by banks rose by 11.3% to CHF 482.9 billion. The number of jobs in banks was up by 6.5% to 136,201 (in terms of full-time equivalents). Once again, domestic job creation was stronger (+4,576) than job creation outside the country (+3704).

Profit and loss account

For most banks, 2007 was a good year in which they recorded a higher profit than in 2006. Of the 330 banks covered, 320 reported a profit, with the total annual profit amounting to CHF 14.1 billion (2006: CHF 20.1 billion). 10 banks recorded losses of a total CHF 4.3 billion (2006: CHF 47.4 million). The negative result of one big bank made a major contribution to the substantial increase in the annual loss.

Net income from ordinary banking operations fell by CHF 5.7 billion to CHF 24.2 billion (-19.0%). This decline is attributable, in particular, to lower net dealing income, which dropped by CHF 8.2 billion to CHF 5.6 billion overall, and by CHF 8.7 billion at the big banks, which thus made a major contribution to this development. At most other bank categories, an increase was recorded.

As in past years, the banks' net income from commission business and services was up (+16.1%), reaching a total of CHF 36.8 billion. This increase was attributable to all bank categories with the exception of the Raiffeisen banks. The largest item under commission business and services – earnings from securities and investment business – rose by 21.5% to CHF 38.5 billion.

Substantially higher depreciation of fixed assets – CHF 11.0 billion as compared to CHF 3.4 billion in 2006 – had a negative impact on the annual results. The 'value adjustments, provisions and losses' item also increased substantially, amounting to CHF 4.4 billion in 2007 (2006: CHF 1.6 billion). The big banks alone were responsible for almost all of the substantial increases in both of these items.

Box: Consolidated accounts for the big banks

In 2007, the published group net profit of one big bank fell from CHF 11.3 billion to CHF 7.8 billion. In the case of this big bank, net profit stated in the individual financial statements as required by law amounted to CHF 3.6 billion. The other big bank recorded a group net loss attributable to shareholders amounting to CHF 4.4 billion. As in the case of the individual financial statements (which showed an annual loss of CHF 4.3 billion), this loss was due to a sharp increase in write-downs. In 2006, a group net profit of CHF 12.3 billion had been recorded.

In the case of the big banks, the difference between the group statements and the individual financial statements as required by law is due to the fact that group accounts include subsidiaries.

Balance sheet business

In 2007, the aggregate balance sheet total for all banks in Switzerland rose by 8.3% to CHF 3,457.9 billion. Domestic assets increased slightly more (+9.8%) than foreign assets (+7.5%). On the liability side of the balance sheet, trends observed in the past few years continued, with liabilities towards other countries rising more strongly than domestic liabilities. The former were up 9.2% while the latter rose 6.7%.

Domestic mortgage claims increased by 3.4% to CHF 665.1 billion (2006: +4.0%). The slower rate of growth was partly attributable to higher mortgage rates. In this business segment, the Raiffeisen banks and the commercial banks recorded above average growth (+7.0%; +6.5%), while the big banks' growth rate was below average (+1.5%). Other claims against customers rose by 14.8% – below the 2006 growth rate of 36.0% – to reach a level of CHF 724.3 billion. Claims against domestic customers were up by 28.0% to CHF 182.6 billion, and those against foreign customers recorded 10.9% growth to reach CHF 541.7 billion.

While bank trading portfolios increased by CHF 24.9 billion to CHF 513.1 billion, financial investments were down by CHF 19.0 billion to CHF 74.4 billion. This is due, to some extent, to the fact that securities have been reclassified and are now listed under trading portfolios instead of under financial investments.

The shift from savings to time deposits attributable to the rise in the interest rate continues: Liabilities towards customers in the form of savings and deposits again declined (-6.4%), reaching the level of CHF 334.9 billion. Other liabilities towards customers, however, rose by 16.5% to CHF 1,184.4 billion, with liabilities arising from time deposits increasing more strongly (+19.6% to CHF 853.1 billion) than sight liabilities (+9.2% to CHF 331.3 billion). In the case of medium-term bank-issued notes, which were up by 19.1% to CHF 41.4 billion, higher interest rates were also the decisive factor in the increase.

Securities held in custody accounts

The value of securities held in custody accounts rose by 7.7% to CHF 5,403.7 billion. Domestic custody account holders in Switzerland held 42.0% of securities, while foreign custody account holders held 58.0%. Institutional customers constituted the most important customer group among custody account holders both inside and outside Switzerland. Their importance has increased steadily over the past few years, and by 2007 they accounted for 57.2% of all customers.

With respect to the individual categories of securities, trends observed in previous years continued to hold good, for the most part, in 2007. In particular, the proportion accounted for by collective investment schemes again rose especially strongly (+20.5%), as did the share of structured products (+16.9%). Money market instruments also became more attractive (+23.2%) due to the fact that money market rates for Swiss francs and euros again increased. Bond holdings were only marginally up (+1.5%). Although increasing uncertainty about the extent of the mortgage crisis in the US may have encouraged some investors to step up their holdings of fixed-interest investments, at the same time, the higher capital market rates led to lower valuations for these securities.

The principal impact of the turmoil on the financial markets was felt in share portfolios. Following favourable share price developments in the first half of the year, price corrections in the second half resulted in a lower valuation of share holdings. Overall, share holdings were almost unchanged (+0.8%). At 36.7% of the total, however, shares remain the most important category of securities.

Fiduciary business

Fiduciary funds managed by banks rose by CHF 48.9 billion, or 11.3%, to CHF 482.9 billion.

Since interest rates for money market investments in Swiss francs and euros increased substantially in 2007, fiduciary funds were increasingly invested in these two currencies. Swiss franc holdings increased by 18.3% while those in euros were up by 23.3%. The higher value of the euro also played a part in the increased investment of fiduciary funds in this currency. At 2.8%, the increase in fiduciary funds invested in US dollars was well below the average for the portfolio as a whole. This was due to the lower interest rate for money market investments in US dollars and the lower value of the US currency. Nevertheless, the dollar was still the most important currency, with an overall share of 47.0%.

Employment

In terms of full-time equivalents, staff numbers were up by 8,280 to 136,201 (+6.5%). As in the previous year, the domestic market, in particular, benefited from the expansion in the workforce. Domestic job creation totalled 4,576, while job creation outside the country came to 3,704.

Conventions used in this publication

0	Smaller than half of the unit used, but larger than zero (<i>rounded zero</i>).
—	No data reported, or a rate of change or a difference was calculated based on two exactly equal values (<i>absolute zero</i>).
.	Figure unknown, confidential, not relevant, no longer reported or no reporting institutions (<i>missing value</i>).
195	In tables with time series, figures printed in bold type are those published for the first time in this issue of <i>Banks in Switzerland</i> or figures published in the last issue that have been revised or corrected.
—	Break in the series.

Notes

Rounding differences

The figures in the tables are rounded. Where rounded figures are used in calculations (totals, balances, rates of change, shares), deviations from the exact values can result.

¹ More information on securities holdings in bank custody accounts may be found in the *Monthly Statistical Bulletin*, published by the SNB.

² Adjustments were made to the reporting of securities holdings in 2005. A number of banking institutions updated the breakdown of their sectoral and securities reporting. Consequently, time-series comparisons for some of the data are difficult.

³ Further information on *reporting entities* and *reporting institutions* may be found in the section entitled *Explanatory notes on the banking statistics* in the SNB publication, *Banks in Switzerland*.

⁴ Allocation to the business sectors pursuant to the 2008 version of the Swiss business classification code, NOGA: private customers (no NOGA code, 97–98), commercial customers (01–63, 68–842, 85–96, 99), institutional investors (64–66, 843), financial and asset management institutions (642–649 and no NOGA code), insurance companies and pension funds (65), pension funds (653).

⁵ Until 2004, holdings of non-profit institutions serving households were reported together with the holdings of private customers. As of 2005, they are reported under commercial customers.

⁶ Without banks for resident custody account holders, with banks for non-resident custody account holders.

¹ More information on securities holdings in bank custody accounts may be found in the *Monthly Statistical Bulletin*, published by the SNB.

² Adjustments were made to the reporting of securities holdings in 2005. A number of banking institutions updated the breakdown of their sectoral and securities reporting. Consequently, time-series comparisons for some of the data are difficult.

³ Further information on *reporting entities* and *reporting institutions* may be found in the section entitled *Explanatory notes on the banking statistics* in the SNB publication, *Banks in Switzerland*.

⁴ Allocation to the business sectors pursuant to the 2008 version of the Swiss business classification code, NOGA: private customers (no NOGA code, 97–98), commercial customers (01–63, 68–842, 85–96, 99), institutional investors (64–66, 843), financial and asset management institutions (642–649 and no NOGA code), insurance companies and pension funds (65), pension funds (653).

⁵ Until 2004, holdings of non-profit institutions serving households were reported together with the holdings of private customers. As of 2005, they are reported under commercial customers.

⁶ Without banks for resident custody account holders, with banks for non-resident custody account holders.

⁷ As of 2005, the principle of beneficial ownership is applied when allocating securities managed by fiduciary agents to individual custody account holder categories.
