Zurich, 11 June 2012

Banks in Switzerland 2011

Main results from the Swiss National Bank's data collection

In 2011, banks in Switzerland recorded profits amounting to CHF 13.5 billion, or CHF 0.3 billion less than in the previous year. The total annual loss amounted to CHF 0.5 billion. In 2010, the total annual loss had come to CHF 3.1 billion. Of the 312 banks covered, 260 reported an annual profit (2010: 267) and 52 an annual loss (2010: 53). Gross profit was slightly down on the previous year's figure. Net trading income and net income from commission business and services declined, while net interest income was up. Staff expenses declined; staff numbers, by contrast, increased slightly. In balance sheet business, another significant increase in domestic mortgage holdings was recorded. Liquid assets also rose sharply; this was attributable to the SNB's measures to increase liquidity on the money market. On the liability side, both sight deposits and savings deposits rose significantly, while time deposits and fiduciary liabilities declined further. Customer holdings of securities in bank custody accounts also decreased. Lower share prices in Europe and the fall in the value of the euro contributed to this decrease.

Key figures ^I	2010	2011	Change
Annual profit (CHF millions)	13 779	13 510	-269
Annual loss (CHF millions)	3 141	512	-2 628

Number of staff (full-time equivalents)	132 010	132 542	(+0.4%)

^I Figures may have been revised since their inclusion in last year's publication. The figures shown in the table are rounded, whereas the changes are calculated on the basis of the exact figures. Consequently, they may deviate from the rounded amounts.

^{II} At offices in Switzerland. Securities held by branches abroad are not included.

The 2011 edition of *Banks in Switzerland* is based on data in banks' (parent companies) individual financial statements, as required by law. For the income statement, the data presented may deviate from consolidated figures, particularly in the case of the big banks. The *Financial Stability Report*, which is released at the same time as *Banks in Switzerland*, uses consolidated financial statements for the big banks. When interpreting the results, this difference in the data basis should be taken into account.¹

Income statement

Of the 312 banks covered (2010: 320), 260 reported an annual profit (2010: 267) and 52 an annual loss (2010: 53). The total annual profit for all the banks declined by CHF 0.3 billion to CHF 13.5 billion. The total annual loss – which was significantly affected by the big banks in 2010 – declined from CHF 3.1 billion to CHF 0.5 billion. Losses were made, in particular, by institutions in the following categories: stock exchange banks, other banks, foreign-controlled banks and branches of foreign banks.

Profit from ordinary banking operations (gross profit) was down by CHF 0.2 billion to CHF 18.7 billion (-1.1%). Gross profit was favourably affected by the result from interest-rate business, which increased by CHF 1.1 billion to CHF 20.8 billion (+5.4%), particularly as a result of the sharp decline in interest expenses. As in previous years, net income from commission business and services decreased. In the year under review, it was down by CHF 1.3 billion to CHF 23.6 billion (-5.1%), with a decrease in commission income from securities trading and investment business, in particular, contributing to this decline. Net trading income fell by CHF 3.1 billion to CHF 8.7 billion (-26.4%). Staff expenses were down by CHF 2.1 billion to CHF 27.1 billion (-7.2%), with the big banks, in particular, reducing their staff expenses.

Balance sheet business

In the year under review, the aggregate balance sheet total for all banks in Switzerland rose by 2.9% to CHF 2,792.9 billion. Most bank categories recorded a rise in balance sheet totals. Small decreases in balance sheet totals were recorded by the big banks and by the foreign-controlled banks category.

Domestic mortgage claims were up by CHF 39.7 billion to CHF 797.8 billion (+5.2%). They have thus risen by nearly CHF 300 billion in the past ten years. The increase during the year under review was mainly accounted for by the cantonal banks (+CHF 15.6 billion to CHF 275.7 billion), the Raiffeisen banks (+CHF 8.9 billion to CHF 128.5 billion) and the

¹ Individual financial statements as required by law (parent company) relate to the business conducted by the banks' head offices in Switzerland and their legally dependent domestic and foreign branches. Consolidated financial statements, however, also include business conducted by the banks' legally autonomous subsidiaries in Switzerland and in other countries (banks and non-banks).

big banks (+CHF 6.6 billion to CHF 240.6 billion). Fixed-interest mortgage claims again rose markedly (+11.8% to CHF 680.1 billion); by contrast, variable-rate mortgages declined (-21.4% to CHF 116.6 billion). In the domestic market, other loans granted to private households and non-financial corporations – shown in claims against customers – rose slightly, as in the previous year. Overall, claims against domestic customers and customers abroad remained almost unchanged at CHF 514.9 billion (-0.5%).

The SNB's measures to increase the liquidity on the money market led to a steep rise of CHF 152.8 billion in liquid assets, to CHF 259.0 billion. In particular, sight deposits with the SNB rose significantly (+CHF 136.1 billion to CHF 174.1 billion). Sight balances with foreign central banks also increased year-on-year (+CHF 13.5 billion to CHF 70.5 billion). However, claims arising from money market instruments fell by CHF 65.1 billion to CHF 78.2 billion. Banks had lower holdings of instruments issued by domestic borrowers (down CHF 43.7 billion to CHF 6.8 billion) and foreign borrowers (down CHF 21.4 billion to CHF 71.4 billion). The decline in holdings of domestic money market instruments was attributable to SNB Bills, the outstanding volume of which was reduced substantially by the SNB during the year.

The trend in customer funds observable in the preceding years continued in 2011. Sight deposits and savings deposits rose, time deposits and medium-term bank-issued notes declined. Interest-related shifts contributed to this development. Overall, there was a marked rise in customer deposits. The higher bank lending was also reflected in the increase in customer deposits. Expressed in figures, liabilities to customers in the form of savings and investments grew by CHF 31.8 billion to CHF 488.5 billion (+7.0%); other liabilities towards customers at sight rose by CHF 68.9 billion to CHF 640.1 billion (+12.1%). By contrast, other liabilities towards customers in the form of time deposits declined by CHF 24.8 billion to CHF 336.6 billion (-6.9%). Liabilities arising from medium-term bank-issued notes fell by CHF 1.9 billion to CHF 34.2 billion (-5.2%).

Securities held in custody accounts

Customer holdings of securities in bank custody accounts declined once again; they were down 4.9% to CHF 4,239.9 billion. Lower share prices in Europe and the fall in the value of the euro contributed to this decrease.

All categories of securities were affected. Equity investments were down by 5.3% to CHF 1,458.7 billion, units in collective investment schemes decreased by 4.4% to CHF 1,271.6 billion and bond investments declined by 1.5% to CHF 1,207.1 billion. Investments in money market instruments, included in the other securities category, receded by 32.7% to CHF 82.4 billion. This decrease is attributable to SNB Bills, the outstanding volume of which was reduced significantly by the SNB. At 34.4% of the total, shares remain the most important category of securities.

The most important investment currency was still the Swiss franc (share: 48.4%), followed by the US dollar (22.5%) and the euro (20.0%). In the year under review, investments in

euros recorded the biggest percentage decrease (-11.8% to CHF 849.9 billion); holdings in Swiss francs also declined significantly (-5.3% to CHF 2,053.2 billion). By contrast, investments in US dollars only diminished slightly (-0.8% to CHF 952.6 billion).

Fiduciary business

Fiduciary funds have more than halved since 2008. Whereas fiduciary funds managed by banks came to CHF 382.4 billion in 2008, in the year under review they stood at CHF 177.4 billion. They declined by 12.1% year-on-year. Fiduciary funds invested in US dollars and euros fell by just under 10%. There was a bigger decrease of about 35% in fiduciary funds invested in Swiss francs; their share thus diminished from 6.1% to 4.5%. The share of fiduciary funds invested in euros rose from 28.9% to 29.8%; that of fiduciary funds invested in US dollars went up from 47.2% to 48.8%.

Employment

The number of employees, measured in terms of full-time equivalents, rose slightly, increasing by 532 or 0.4% to 132,542. This rise can be ascribed both to employees in Switzerland and those abroad. The number of people employed abroad rose by 429 or 1.8% to 24,442, and the increase was again almost entirely attributable to the big banks (+573). In Switzerland, the number of people employed by the big banks decreased slightly (-173). However, most other bank categories increased their staff numbers in Switzerland. Overall, the number of employees in Switzerland went up by 103 or 0.1% to 108,100.

¹ Due to the introduction of the new Basel II capital requirements, figures for 2009 onwards are not directly comparable with those for the previous years. Some columns have not been stated for the years before 2009 because of the difference in the two approaches.

² When interpreting the data, consideration should be given to the impact of the transitional provisions under art. 124 and, in particular, art. 125a Capital Ordinance. Under the latter article, the margin call per head on a single amount may no longer be included by banks legally formed as cooperatives. This provision is being introduced in two steps. Cantonal banks are also losing the option of making deductions from required capital; here, too, the provision is being introduced gradually.

³ Eligible short-term subordinated debt-covering market-risk (Tier 3) less specific deductions from capital.

⁴ The difference between the gross and the net figures in the total required capital is attributable to less or more stringent application of the equity guidelines as set out in arts. 124, 62, 33, para. 3, and 125a Capital Ordinance and art. 4, para. 3 Banking Act.

⁵ The minimum Basel standards call for a total capital ratio of at least 8%.

⁶ The FINMA core capital ratio cannot be directly compared with the BIS core capital ratio (the BIS Tier 1 ratio) because some of the risk weightings differ.

¹ More information on holdings of securities in bank custody accounts may be found in the *Monthly Statistical Bulletin* published by the SNB.

² Adjustments were made to the reporting of holdings of securities in 2005, when a number of banking institutions updated the breakdown of their sectoral and securities reporting. Consequently, time series comparisons for some of the data are difficult.

³ Further information on reporting entities and reporting institutions may be found in the section entitled *Explanatory notes on the banking statistics* in the SNB publication, *Banks in Switzerland*.

⁴ Allocation to the business sectors pursuant to the 2008 version of the Swiss business classification code, NOGA: private customers (no NOGA code, 97–98), commercial customers (01–63, 68–842, 85–96, 99), institutional investors (64–66, 843), financial and asset management institutions (642–649 and no NOGA code), insurance companies and pension funds (65), pension funds (653).

⁵ Until 2004, holdings of non-profit institutions serving households were reported together with the holdings of private customers. As of 2005, they are reported under commercial customers.

⁶ Excluding banks for resident custody account holders, including banks for non-resident custody account holders.

² Adjustments were made to the reporting of holdings of securities in 2005, when a number of banking institutions updated the breakdown of their sectoral and securities reporting. Consequently, time series comparisons for some of the data are difficult.

³ Further information on reporting entities and reporting institutions may be found in the section entitled *Explanatory notes on the banking statistics in the SNB publication, Banks in Switzerland*.

⁴ Allocation to the business sectors pursuant to the 2008 version of the Swiss business classification code, NOGA: private customers (no NOGA code, 97–98), commercial customers (01–63, 68–842, 85–96, 99), institutional investors (64–66, 843), financial and asset management institutions (642–649 and no NOGA code), insurance companies and pension funds (65), pension funds (653).

⁵ Until 2004, holdings of non-profit institutions serving households were reported together with the holdings of private customers. As of 2005, they are reported under commercial customers.

⁶ Excluding banks for resident custody account holders, including banks for non-resident custody account holders.

⁷ As of 2005, the principle of beneficial ownership is applied when allocating securities managed by fiduciary agents to individual custody account holder categories.
